

Lawson for Fashion and M3 10.1

Lawson made two important announcements on 18 Feb 2010. We launched:

- “Lawson for Fashion”, the second solution in the “Lawson for” series
- Lawson M3 10.1 became generally available and contains support for 39 countries and 16 languages.

Augusta Sportswear Teams with Lawson to Grow Its Business

In 1999, Georgia-based Augusta Sportswear’s growing business put it on a quest for a fashion-specific ERP solution.

“We were looking for a provider with a solution that could grow and expand with us and that had an established R&D process for continuous product development,” says Augusta’s Chief Financial Officer Pat Harris. “We found the answer in Lawson M3.”

“Once we had Lawson M3 in place, we discovered a big increase in the transactional volumes we could handle,” adds Executive Vice President of Sales and Marketing David Frank. “This was an important realization because it allowed us to grow organically without the need for additional resources.”

Lawson M3 Enterprise Search (LES)

Lawson M3 Enterprise Search (LES) is a deeply integrated, intuitive, simple-to-use search application for Lawson and non-Lawson data to help you search and find relevant information securely and fast. LES provides an entry point into the Lawson ecosystem by producing search results from Lawson ERP as well as user’s desktops that they can act upon.

Using a separate and dedicated search engine LES is the single solution to transform how you use your existing Lawson M3 applications without affecting performance.
